

Beneteau Oceanis 343 -ELECTRIC PROPULSION-

€89,000

Ref: NM1513

Location: Barcelona

Length: 10,82m

Fantastic opportunity to buy a fully electric propulsion boat in excellent condition and only used for demo purposes.

Very recent conversion to electric propulsion at a cost of almost 30k EUR.

Powered with a 12Kw Oceanvolt electric motor, with a battery capacity of 14,4 Kw which translates into a range of up to 30 NM. Battery capacity can be extended very easily for more extended range.

The condition is amazing for the age, the boat has been unused on dry dock for 15 years.

Don't hesitate to contact us for further details!
